

What is the energy security & net zero Committee?

The Energy Security and Net Zero Committee scrutinises the policy, spending and administration of the Department for Energy Security and Net Zero and its public bodies, including Ofgem and the Committee on Climate change. You can follow the Committee on X (formerly Twitter) @CommonsESNZ.

Should the UK invest in a strategic reserve of electricity storage?

A strategic reserve of electricity storage is a critical investment to secure the UK's energy supply against future shocks, but the Government is still equivocating over whether it is necessary to invest in one. Since 2023, the Government has had a Department for Energy Security and Net Zero.

Can long-duration energy storage improve energy security?

The Committee's report on long-duration energy storage concludes that the Government must act fast to ensure that energy storage technologies can scale up in time to play a vital role in decarbonising the electricity system and ensuring energy security by 2035. Long-duration energy storage can reduce curtailment of renewables and grid congestion.

Will the government implement a policy on longer duration energy storage by 2024?

The Government will implement a policy on longer duration energy storage by 2024. Acknowledgements POSTnotes are based on literature reviews and interviews with a range of stakeholders and are externally peer reviewed.

Will unabated gas be a back-up to energy security?

The need for continued unabated gas generation into the 2030s as a back-up to ensure energy security and reduce costs has been recognised by the Climate Change Committee. Today's plan keeps the UK on track to meet its net zero targets. Prime Minister, Rishi Sunak, said:

What is the long duration energy storage Investment Support Scheme?

Long Duration Electricity Storage investment support scheme will boost investor confidence and unlock billions in funding for vital projects. The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure.

SEAC's Storage Snapshot Working Group has put together a document on how to make new construction energy storage-ready and how to make retrofitting energy storage more cost effective. It provides practical ...
