

New solar photovoltaic panel installation

Can solar panels be added to a new build?

For new builds and self-builds, you'll likely be looking at solar photovoltaic panels and/or solar hot water (solar thermal) systems. Instead of looking at options to traditional heating systems, solar panel installations can be added to new builds to improve the EPC and overall energy efficiency.

How are solar panels installed?

We use a safe and strong installation method that uses friction to hold the rail and the edge of the solar panel securely in place. This system has been tested for heavy rain, hail and even hurricanes, so you know it's reliable. The panels are then laid on top of the rails, ready to be connected.

What is needed to install solar panels on UK homes?

Here's a quick guide to what's needed to install solar panels on UK homes: An installer should visit to determine if the property is suitable for solar panels. They will look at the size and orientation of the roof to decide the best location and angle for installing panels.

Can you install solar panels on your roof?

Homes and businesses will be able to install rooftop solar panels more easily, under new rules announced today. Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system.

How do I choose a solar energy installer?

Look for installers that have a proven track record and check if they are accredited by relevant industry bodies, such as the Microgeneration Certification Scheme (MCS) and/or the Renewable Energy Consumer Code (RECC).

How do I contact us if I want to install solar panels?

You can use the 'Contact Us' form if you're a building developer, contractor or architect looking to install solar panels for your new build projects. You buy the kit at trade price; your contractors install to our design and specification. Then our installation partners will certify (MCS) the install.
