The federal government, in collaboration with the World Bank, has deployed an advanced Supervisory Control and Data Acquisition (SCADA) system, a significant step towards enhancing the stability and reliability of the national power grid.

A system aimed at enhancing the efficiency and reliability of the nation's power supply. The unveiling took place in Abuja, where Minister of Power, Adebayo Adelabu, highlighted the system's transformative impact.

The Federal Government of Nigeria has launched an Advanced Supervisory Control and Data Acquisition (SCADA) system to revolutionise the management of the national power grid, a move heralded as a game-changer for the country's energy infrastructure.

The federal government, in collaboration with the World Bank, has deployed an advanced Supervisory Control and Data Acquisition (SCADA) system, a significant step towards ...

The Transmission Company of Nigeria, TCN, has deployed a \$56 million Supervisory Control and Data Acquisition (SCADA) system, funded by the World Bank, to reduce frequent power grid collapses and enhance supply reliability.

The Transmission Company of Nigeria, TCN, has deployed a \$56 million Supervisory Control and Data Acquisition (SCADA) system, funded by the World Bank, to reduce frequent power grid ...

The SCADA system is part of a broader initiative under the Nigerian Electricity Transmission Access Project, aimed at modernizing the nation's power infrastructure and implementing smart grid technologies.

The Minister of Power, Mr Adebayo Adelabu, reaffirmed the Federal Government's commitment to ensuring grid stability for sustainable power delivery during the demonstration of the new Supervisory Control and Data Acquisition (SCADA) system in Gwagwalada, Abuja.
