Norway solar places

The leader of the Solar Energy Cluster Trine Kopstad Berentsen, demands far more. "It is weak that the government does not have a stated ambition for what they want with solar power production in Norway. With better framework conditions, the solar industry can deliver 7-10 TWh of annual solar power production by 2030", says Berentsen.

Norway is Europe's largest producer of hydropower and the 6th largest in the world. 90% of capacity is publicly owned. [7] The largest producer is the Norwegian government, through the state-owned Statkraft which in turn, owns nine of the largest hydroelectric plants and is also a major player in the international energy markets. Electricity is also produced by a number of ...

Store Norske Energi, a state-owned energy company based in Longyearbyen, is testing whether solar energy could be used to transition Spitsbergen to emissions-free, hybrid energy. The company has installed 360 solar panels along with a battery bank and thermal storage system at Isfjord Radio, an old shipping radio station.
