Who is Okapi solar?

At Okapi Solar, we are dedicated to empowering homeowners across Southeast Asia with affordable and sustainable energy solutions. Specializing in solar financing, we collaborate with trusted solar installers to offer tailored financing plans that make rooftop solar installations accessible and affordable for everyone.

Who is Okapi technologies?

Okapi Technologies was founded with the mission to make affordable residential solar energy accessible to homeowners in Malaysia and Southeast Asia. In December 2022, we launched a 10-year residential solar financing product, aligned with the NEM program, partnering with forward-thinking solar installers to promote sustainability.

How does Okapi solar financing work?

Okapi Solar's financing plans are designed specifically for landed residential properties, allowing homeowners to install solar panels with zero upfront payment and fixed monthly lease payments over a period of up to 10 years.

Does Okapi buy or lease solar panels?

Okapi buys the solar panels first, and then leases it to homeowners. Zhen Yung and Christopher, both with backgrounds in banking and engineering, share their journey of leaving the corporate world to venture into entrepreneurship.

What is Okapi leasing?

Okapi offers zero capex instalment plans for homeowners that want to install solar panels on their rooftops. Our instalment plans are tailored to ensure that you start saving from day 1. How much are the monthly payments?

In the heart of Kakuma, where the sun shines brightly and the dreams of the young are as vast as the savannah, Okapi Green Energy Limited has embarked on a mission to harness the power of the sun and transform lives.

Our zero downpayment plans make solar energy both affordable and accessible, offering flexible leasing options tailored to your specific needs. Choose us for a seamless transition to solar power and start saving today.

Together, Renewvia and Okapi will design, finance, install and operate a scalable, innovative solar minigrid system, expanding access to power from 200 people to up to 15,000 living within the Kakuma III section of the refugee camp.
