

Does Oman import or export energy?

Oman both imports and exports energy. When Oman declined as an entrepot for arms and slaves in the mid-19th century, much of its former prosperity vanished; the economy turned almost exclusively to agriculture, camel and goat herding, fishing, and traditional handicrafts. Today, petroleum (oil) exports fuel the economy.

How much energy does Oman use?

Energy use in Oman was 381 TWh in 2020, almost double the consumption in 2010. Oman is a country in the Middle East. Its current GDP per capita has expanded continuously over the past 50 years. It grew 339% in the 1960s and reached a peak growth of 1,370% in 1976. [citation needed]. Oman both imports and exports energy.
