A combination of factors, including climate change, rising energy demands and limited hydrocarbons resources, have driven Oman's renewable energy agenda in recent years. Although renewables were estimated to have made up less than 1% of the country's electricity mix in 2018, the Oman Power and Water Procurement Company (OPWP) aims to roll ...

5 ???&#0183; Paris/Oman, December 11, 2024 - In line with its multi-energy strategy in the Sultanate of Oman, TotalEnergies is pleased to announce, together with its partner OQ Alternative ...

Placing the Sultanate of Oman on the international map as its exporters. Serving the Omani local market including the industrial sector. Enhancing the Omani environment through: Clean energy generation. Treatment and disposal of hazardous wastes. Disposal of hazardous industrial waste. Wastewater treatment

As the sultanate looks to manage its energy transition and inject capital into its fiscal balance, privatisation, sector reorganisation and renewable energy are key topics on the agenda for ...

In October 2022 Oman became the third GCC country to commit to net-zero emissions by 2050, in support of the Paris Agreement. Following the UAE and Saudi Arabia - which in 2021 pledged to reach net-zero - Oman aims to build on a series of clean energy investments and power projects across the sultanate.

HMR will conduct environmental & social impact assessments, based on two decades of experience in Oman. The announcement also includes a graphic visualisation of the wind and solar generating areas being studied, and a site for ammonia manufacturing on the Oman coast, south of Duqm city:

Oman has selected two large-scale projects for the development of green hydrogen production plants in the region of Dhofar worth USD 11 billion (EUR 10.26bn) in investments as part of the second round of the Sultanate's green hydrogen tender.
