

Who surveys the solar market in Switzerland?

The Swiss Federal Office of Energy has been surveying the solar market in Switzerland for more than 20 years. Due to this long experience the quality of the data has been maintained, thanks as well to all the installers and distributors who are willing to complete the annual questionnaire.

What does swissolar do?

On behalf of the Swiss Federal Office of Energy, Swissolar is mandated to survey the Swiss solar market and publish the annual installed capacity in the report: "Statistiques de l'énergie solaire: Annuaire de référence 2022". The data is based on a survey amongst 398 companies active in the PV and solar thermal market.

Why are solar panels so popular in Switzerland?

Solar panels have become especially popular in industrial, commercial and service industry sectors. They now provide enough energy to power over 4.7% of Switzerland's entire energy consumption, up from 3.8% in 2019, Swissolar said in its annual report.

How much solar energy does Switzerland use in 2022?

Solar energy production accounted for 6.76% of Switzerland's electricity consumption in 2022 (4.89% in 2020). This year, solar energy will cover more than 8% of demand. The number of new storage batteries installed more than doubled compared with the previous year. The average storage capacity rose sharply from 12 to almost 15 kWh.

Can solar energy be used in Switzerland?

Although the proportion of solar heat to overall consumption in Switzerland is still relatively low, its potential is considerable. If all existing buildings were to be optimally improved in terms of energy efficiency, it would be possible to meet the heating requirements of all Switzerland's households through the use of solar collectors.

How much solar power can a Swiss house generate?

According to a recent study by the Swiss Federal Office of Energy (SFOE) based on data from a solar potential cadastre (sonnendach.ch) and meteorological data, Swiss houses and factories could generate up to 67 TWh of photovoltaic power per year (current power consumption is around 60 TWh).
