1 ¶ These news stories tend to focus on mild, sunny spring days when the days are getting longer. On those days, solar farms make a lot of solar, but we don't use a lot of electricity, resulting in a surplus. But our electrical grid is not built for mild spring days. It is built for hot summer days when electricity demand is the highest.

Solar installation business Solarlec has been placed into liquidation by its directors, becoming the latest company to have done so following last year's feed-in tariff review. Solar Power Portal understands that as many as 170 jobs could be lost as a result of the liquidation, losses which the company has squared solely with the government ...

Explore the solar photovoltaic (PV) potential across 2 locations in Paraguay, from Asunción to Fernando de la Mora. We have utilized empirical solar and meteorological data obtained from NASA's POWER API to determine solar PV potential and identify the optimal panel tilt angles for these locations.
