What is Autodesk solar design software?

An intuitive web application to assess sites, perform optimizations, and quickly generate layouts CAD automation for large ground mounted layouts, precision solar engineering within AutoDesk technology. Founded in 2015 by a team of solar developers and electrical engineers, our mission has been to make easy to use PV design software tools.

How to create a 3D model for solar panels?

Placing 2D polygons together with height dimensions will result into an extruded 3D model. Experienced CAD designers or 3rd party design studios can use these generated 3D models in your project as well. Generate optimized 3D module layouts to maximize the number of solar panels in your projects.

Why should you use PV design software?

Our PV design software speeds up the entire engineering process and saves you more than 75% on engineering time and cost. We remove repetitive and time-consuming tasks by automating calculations, layouts and reports. Automatic configurations (design phase) and augmented reality (construction phase) will prevent wrong installations.
