Do solar panels need cleaning?

There are some instances where solar panels might need cleaning, but most of the evidence says solar panels are self-sufficient and low-maintenance. We'll get to the best way to clean your solar panels in a minute.

How often should you clean your solar panels?

On average, cleaning your solar panels at least once or twice a year is recommended to maintain optimal performance. However, the frequency can be influenced by various factors like: Environment: If you live in an area with dust, pollution, or airborne debris, you may need to clean your solar panels more often.

How to clean a solar panel?

Many cleaning products are too abrasive for solar panels or may leave a residue that blocks sunlight, so you should choose these carefully. Try mixing a mild detergent in water, slowly adding more cleaner if you need more cleaning power. The last step in solar panel cleaning is to dry the glass and review your work.

Should you clean solar panels without feet firmly planted?

Never clean solar panels without your feet firmly planted on a stable surface. While cleaning, it's crucial to avoid damaging any electrical components, as this could make the solar panels less effective or disrupt their operation altogether. Always weigh the safety risks and benefits before cleaning your solar panels.

How much does solar panel cleaning cost?

"Solar panel cleaning costs between \$4 - \$15 per panel. The total solar panel cleaning costs will be affected by several factors, the biggest of which would be if your solar panels are on the ground floor or on upper floors," explains Checkatrade. "The higher the panels, the more expensive they will be to clean."
