

Photovoltaic panels do not need a roof

Can you install solar panels on a roof in the UK?

The majority of UK homes have a roof suitable for solar panel installation. Great news for anyone looking to generate their own renewable electricity. If you'd like to speak to an MCS certified (or equivalent) solar installer for advice - you can get free no-obligation quotes from up to 4 solar installers in your area using Solar Guide.

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Can solar panels be installed on a flat roof?

You can have solar panels on a flat roof, but they need a specialist mounting system to raise them to a suitable angle and provide ballast. Designing the system also requires a compromise between packing the available space and leaving room for shading between rows of modules.

Can a roof be used for solar panels?

Even a roof that doesn't fit the ideal requirements can still be suitable for solar panels. Solar installers will provide slightly differently advise about the most suitable way to maximise energy generation. They will also recommend additional technologies you can use to boost your supply.

How long do solar panels last on a flat roof?

Most UK roofs are strong enough to hold solar panels for their entire lifespan - which can last 40 years or more. This is because a solar panel system usually weighs about 20kg per square metre, which the great majority of roofs can hold. However, flat roofs may not always be strong enough for solar panels.

Can solar panels be installed on a north facing roof?

While it isn't recommended to have solar panels installed on a north facing roof in the UK, you can still have them installed if you wish but they won't perform as well - as we saw from the table above. So if you don't have a south facing roof, don't let that put you off the idea of renewable solar energy as it is still very much a possibility.

Pros of Solar Panel Systems. Solar panel systems come with many financial and environmental benefits. When we polled homeowners on why they wanted to go solar, the three most popular reasons were to save money ...

3 - A Heavy Shaded Roof. Although solar panels do not require full sunlight to operate, they do require daylight. Heavy shade, therefore, still negatively impacts the efficiency of a solar panel. Trees, chimneys, and ...
