

Pitcairn: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

Several meetings were held on Island and by teleconference with our partners and the Solar Energy project began to take shape. The aim of the project is to ensure that every Pitcairn home and government building has a power connection from the grid to ...

The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy ...

Despite this, the technology sector remains relatively underdeveloped, with potential for growth and innovation. The islands have also begun to explore renewable energy solutions, particularly solar power, due to abundant sunlight and the need ...

Currently, most housing on Pitcairn Island is geared towards short-term tourism, making it financially inaccessible for volunteer workers who play a crucial role in our community. We have launched a project to renovate existing housing specifically for volunteers.

The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy system.

PSI is an international company focused on creating innovative, high-quality products and custom solutions around the globe. We design and manufacture custom 5VDC-48VDC power supply and UPS solutions for telecommunications, utilities, security and alarm, wireless and renewable energies markets.
