I purchased a Ginlong GCI-2k wind inverter by mistake as the specs read that it can be used for both wind and solar. I have setup the power curve to match the pv panels I am using but I am getting about 75% efficiency. I want to know if it can be converted easily to work with solar. Also can anyone recommend an inexpensive 250 vdc watt meter ?

It's an attitude that serves the firm well as it seeks to make a case for its role in the spread of solar power around the world. For Ginlong Solis, the 15-year journey has been a rewarding trip, with its products sold in 100+ ...
