

As nearly one thousand photovoltaic (PV) panels sparkled in the sun and colorful flags fluttered in the breeze in the tawny Gobi desert, an off-grid PV power station project undertaken by a Chinese company in Somali region, Ethiopia, was officially completed and electrified recently.

The power will be sold at the rate of \$0.059kWh for a period of 20 years. The capacity to be procured is 100MW. About Enel Green Power. Enel Green Power SpA (EGP), a subsidiary of Enel SpA, is an energy company that develops and manages activities of energy generation from renewable sources.

Off-grid solar energy systems have been successfully implemented in Ethiopia thanks in large part to non-governmental organizations and private businesses. By giving locals access to power, these programs not only raise residents' quality of life but also lessen poverty and increase economic prospects.

Situated in the Corbetti Caldera 250km south of Addis Ababa, Corbetti Geothermal ("Corbetti") will be a pioneering project: it is situated on a greenfield site, will prove a new geothermal resource, and be one of the first pair of privately developed, owned, and operated geothermal IPPs in Ethiopia, which is only the second country in sub-Saharan Africa to develop geothermal privately.
