

Inverter: Converts DC electricity from the batteries to AC electricity that can be used to power appliances and electronics; Off-grid solar systems can be used to power a variety of homes and businesses, from small cabins to large office ...

Use solar energy to power your home and reduce your electricity bill. By installing solar, sunlight would be used to power your premises at a reduced cost. Power Shift provide solar systems for commercial and residential applications.

A solar electric system converts sunlight into electricity using solar cells. Solar panels can be mounted on rooftops or the ground, and convert particles of light energy, known as photons, into direct current (DC) electricity. An inverter changes DC power into alternating current (AC) to power your home or facility. Solar is a proven technology.
