1. Why is the charging efficiency low when the product is used to recharge my devices? A solar panel captures the sun 's energy and turns it into electricity. The intensity of solar radiation that a solar panel receives depends on a variety of factors, including season, time of day and cloud cover, etc. The product output power decreases when the solar radiation intensity becomes low.

"The development of renewable power plants is a key pillar in reducing carbon emissions. The Tembesi Floating Solar Plant can serve as a catalyst for foreign investment in Batam and further strengthen the region's energy infrastructure," said Hartanto Wibowo, Director of Corporate Planning and Business Development at PT PLN (Persero).

energy source utilization in Batam but also serves as a model for the subsequent development of Floating Solar Power Plant in Batam with a potential capacity of more than 1 GW.
