

What is Rag energy storage?

In response to these needs, on 1 January 2013 Rohöl-Aufsuchungs Aktiengesellschaft (RAG) formed a modern, customer friendly subsidiary, RAG Energy Storage, to market its storage capacity. Gas storage facilities fulfil a variety of functions on the energy market. Gas storage facilities fulfil a variety of functions on the energy market.

How does Rag contribute to the security of gas supply?

RAG operates around 6% of total gas storage capacity in the EU. 50% of our gas reservoirs have been converted into gas storage facilities. Therefore, we make a major contribution to security of supply in Austria and Central Europe.

How much gas does Rag have?

The company has gas storage capacity of about 6.3 billion cubic metres of natural gas, or about 6% of total capacity in the EU. RAG has already converted large parts of its gas reservoirs into storage facilities. These can supply the stored energy at any time and at high capacity.

How can Rag help Austria achieve its climate goals?

The company also develops leading edge energy technologies related to green gas that partner renewables. This is enabling RAG to play a vital role in attaining Austria's ambitious climate goals, and in the sustainable stewardship of the country's raw material and energy supplies.
