

Why should you choose refustor energy storage systems?

"REFUstor's energy storage systems will complement and enhance our current hybrid energy storage product offerings and will further accelerate our development of new technologies as we continue to provide our commercial and industrial consumers with leading solutions for their adoption of renewable energy.

Can refustor be used with existing PV systems?

The AC-coupled REFUstor can be easily integrated with existing PV systems. The highly modular solution allows it to be used in systems from 50 kW up to MWs in size to meet the demands of both energy and power applications. The REFUcontrol BC-10 EMS is our solution, completing our REFU inverter that you can build your own Battery System.

What makes refu a successful company?

The key to our success lies in our ability to combine the expertise in controllable power electronics with customer-specific designs and production. REFU is a part of the multinational, diversified PRETTTL Group.

What makes refu a great inverter?

REFU has won since its start in 2007 numerous tests of branch magazines, accounting a huge installation base. Based on the patented Ultra-Eta-Topology REFU for high efficiency in real operation, now continues to use the latest SiC-Technology. REFU inverters are also designed for simple and installer-friendly installation.
