

Most of Perenco's products come from the Rio del Rey, Moudi, and Ebome concessions. In 2018, Perenco and SNH partnered to develop the LNG (Liquefied Natural Gas) market through the Hilli Episeyo, the 2nd largest floating natural gas liquefaction plant in the world, installed off the coast of Kribi, in south Cameroon.

Perenco, an independent hydrocarbon producer, has recently signed a new 20-year production sharing contract with Cameroon's National Oil Company, Soci t  Nationale des Hydrocarbures (SNH). The contract is aimed at continuing the development of the Rio del Rey Basin, located offshore Cameroon. The Rio del Rey Basin accounts for about 70% of ...

At Rey Energy, we believe that renewable energy is the future, and we are dedicated to creating a more sustainable future for everyone. With our deep industry knowledge and almost 20 years of experience, we offer a wide range of renewable energy solutions that are tailored to the specific needs of our clients.

Cameroon and Nigeria have huge wind energy potentials with similar climatic conditions and can benefit greatly from the huge success recorded in South Africa in terms of policy implementation ...

Independent hydrocarbon producer, Perenco, has signed a new 20-year production sharing contract with Cameroon's National Oil Company, Soci t  Nationale des Hydrocarbures (SNH), for the continued development of ...

Perenco and Cameroon's National Oil Company have signed a new production sharing agreement for the Rio del Rey basin which will unlock a new era of energy security and economic growth for the west African country.

gas developments have also provided Cameroon with a source of LPG, allowing the country to reduce its imports by nearly 30% while supporting its strategy of energy independence and reduction of carbon emissions. Today, Perenco in Cameroon is the leading national oil operator with a production of 90,000 boepd (60% oil and 40% gas).

As a mature producer, Cameroon is at a critical crossroads in its oil and gas development, requiring new exploration to offset diminishing reserves, while finding alternative pathways to monetize small and stranded gas reserves. As a result, the country has attracted a slew of independent explorers who are launching new exploration activities and developing ...
