

Who is building the largest solar project in Trinidad and Tobago?

Today, the Government of Trinidad and Tobago has officially given the green light to project partners, bp, Shell and Lightsource bp to begin construction of the largest solar project in the Caribbean.

Should Trinidad & Tobago invest in wind and solar energy?

Tapping into Trinidad & Tobago's vast wind and solar resources for domestic electricity consumption would allow it to export more natural gas and use the extra revenue to finance its broader, long-term energy transition plans. Why do financial institutions have a role to play in energy transition?

Who owns 148mw solar project in Trinidad & Tobago?

The Government of the Republic of Trinidad and Tobago (GoRTT) has approved the consortium partners 148MWp solar project. The consortium have reached the Final Investment Decision, with bp and Shell initially having joint shareholdings of the project (50/50).

Can Lightsource BP accelerate the energy transition in Trinidad & Tobago?

With the experience of bp and Shell, as major operators in Trinidad and Tobago's energy industry, combined with Lightsource bp's global solar expertise, the group represents the huge potential to accelerate the energy transition through collaboration.

Are there green energy sources in Trinidad & Tobago?

As there currently are not many green energy sources available in Trinidad & Tobago, local businesses must work towards developing their own and place additional emphasis on energy efficiency and conservation.

How many photovoltaic systems are there in Trinidad & Tobago?

Two 2-KW of-grid photovoltaic (PV) systems are in operation at the University of Trinidad & Tobago and the Trinidad & Tobago Electricity Commission. Twenty-one 1-KW PV systems had also been installed at schools around the country by 2020. The electricity generation mix in Trinidad & Tobago is still dominated by fossil fuels.
