

Are solar panels a good investment in the Netherlands?

An average-sized installation of 12 solar panels produces about 4000 kWh a year when you are buying solar panels in the Netherlands. With electricity prices at 30 cent p. kWh, that's EUR 1200,- saved. An installation of EUR 5500,- means an RUI of less than 5 years. There are very few investments which are this safe with the same RUI.

How many solar panels are installed in the Netherlands?

Currently (2020) there are about 24 million panels installed in the Netherlands and this amount is still increasing rapidly. Growing environmental awareness, falling prices of solar panels and low interest rates ensure rapid growth. Together, these panels account for 7,000 MWpik. That is 5% of the total electricity production in the Netherlands.

How many solar panels does a Dutch House need?

The number of solar panels needed for your home also depends on a few factors, including: The average home installation falls between 10 to 12 solar panels, which would partially power the average Dutch house with solar energy. Solar panels can cover your entire roof in the Netherlands, depending on your energy needs. Image: Freepik

Can you install solar panels in a Dutch home?

Contemporary Dutch homes, with their expansive roofs and minimalist design, offer a wonderful canvas for solar installations. These homes often allow for a more extensive array of panels, maximizing energy capture. The goal is not just to add solar panels but to integrate them in a way that complements the beauty of Dutch architecture.

How does the Dutch government support solar panels?

The Dutch government recognizes the importance of a green transition and actively supports residents and businesses in their solar endeavors. Here are some ways the government lightens the financial load: Periodically, the government rolls out subsidy programs to offset the initial costs of solar panel installation.

How do I get a tax return for solar panels in the Netherlands?

In the Netherlands, where the VAT is 21% on regular items, this means that people save an additional 1/5th of the price on their investment. To be awarded this return for buying solar panels in the Netherlands, you must apply to the tax office to change your status to a business owner.

A 600-watt solar panel is a robust and efficient choice for home solar energy systems. On a bright day, one 600-watt panel may generate roughly 600 watts or 600-watt-hours per hour. Furthermore, most solar panels have a maximum power output, or "nameplate rating," that is only reached under optimal conditions.
