The criteria used in the Zambia Scaling Solar program RFQs (40, 62) were clear, transparent, and covered the key technical issues. The 2-stage RFQ/RFP bidding process used is a suitable best-practice approach. The selection of the first round winning bids was completed within the target time period. The available first and second round Scaling

This report describes accuracy enhancement of Solargis solar resource data for Zambia based on the ground measurements collected at six solar meteorological stations across the country. The accuracy-enhanced solar model makes it possible to calculate time series for any location with lower uncertainty. This effort results in more

We are using state-of-the-art technology for tracking the Sun's path at the Ngonye solar PV plant in Zambia. This is the first time a system of this kind has been used in Sub-Saharan Africa, as we endeavour to provide stable - and sustainable - energy.
