and cost-effectively ...

Solar panel manufacture in Indonesia appears primed to thrive with the increase in solar power projects. In addition to serving IPPs developing new on-grid systems to replace diesel power generation facilities, the many off-grid and PV Stand Alone system projects undertaken by PLN in remote, outlying islands presents another area of opportunity.

Since then several new facilities have come online on islands east of Java. This year, PLN signed power purchase agreements at less than 6 cents a kilowatt-hour for 50 megawatts of solar power in Bali. In August the government added a multibillion-dollar solar project in the Riau Islands to the docket of national priority projects.
