

The Strategy recognizes the need for Guyana to switch from nearly 100% dependence on fossil fuel-based electricity to clean, renewable energy supplies. Globally, renewable energy costs, particularly solar and battery storage, have dropped significantly over the past five (5) years.

These tropical forest types of central Guyana may represent some of the lowest diversity forests in the neotropics, whereby the total number of tree species is relatively limited, typically with six dominant canopy species, but the relative abundance of these species is highly variable between the forest types. Studies were undertaken on the floristic composition and ...

Here are a few of Loom Solar's most popular selling Mounting Structures: i) Loom Solar 1 Panel Stand (40-180 Watts) This portable stand is suitable for mounting one solar panel of any brand ranging in between 40 W and 180 W. It can be comfortably installed on the rooftop of your home. Made of galvanized iron, this stand is rust proof, has a ...
