Paraguay is one of the few countries in Latin America that has maintained an integrated electrical system. [1]Because of the dominance of hydroelectricity, tariffs (mostly residential) are remarkably below the averages for the region. However, despite the abundance of resources, the Paraguayan electricity system faces difficulty due to the lack of investment in transmission and ...

A solar plant could further diversify the matrix, ensure supply during droughts, and boost economic development by exporting renewable energy. The initial investment in a solar plant may seem high, but the long-term benefits far outweigh the costs, generating a positive economic and environmental impact for the country. Solar Energy: Stable Costs
