

Solo power Suriname

Who is SoloPower?

SoloPower is an innovator of thin-film photovoltaic (PV) cells and modules. The SoloPower mission is to mass-produce PV modules for ubiquitous applications on a global scale at a cost that is 1) lower than the traditional wafer-based solar technologies, and 2) at parity with that of conventional power grid.

What happened to SoloPower?

SoloPower was announced a winner of the 2012 TiE50 award in the category of Clean Energy. The company closed its doors in late 2017 [citation needed] and is no longer operational. The Norwegian firms Convexa Capital, Spencer Energy and Scatec have invested approximately \$30 Million into SoloPower in 2007.

Who founded SoloPower?

SoloPower was founded by Bulent Basol and Hodayoun Talieh in 2005. The company started its pilot manufacturing line in December of the same year. In 2010, the company secured \$45 million in debt financing and used \$19.9 million of that to acquire the shares of ousted founders Talieh and Basol.

Did SoloPower buy out Hodayoun Talieh?

Silicon Valley American City Business Journals. Retrieved 29 November 2018. SoloPower Inc. used a portion of a new \$44.9 million debt financing to buy out the shares of co-founder and ousted CEO Hodayoun Talieh.

^ Ehren Goossens (17 February 2011).

The discrete bipolar design is unique to Solo 500, and uses Linn's Dynamik switch mode power supply to deliver 500 W of effortless, instant power across the audible band. Use a pair of Solos for a passive stereo set-up, and add more to multi-amp your speakers or upgrade to a fully Aktiv or Exakt set-up, in conjunction with Klimax Exaktbox.

SP3. SoloPanel ® SP3 is our second-generation, large-format flexible module engineered for commercial and industrial building applications.. The SP3 module is easily configured for multiple adhesive applications, enabling rapid installation and low-cost system integration with a wide variety of roof substrates such as EPDM, TPO, Built-up-roofing / Modified bitumen.

TECHNOLOGY. Ultra-thin. Remarkably lightweight. Flexible form factor. SoloPower Systems leads the way with a line of thin-film CIGS lightweight photovoltaic (LPV) solar cells that adapt to virtually limitless site-specific applications.

Technology: Thin-Film Photovoltaics. Ultra-thin. Remarkably lightweight. Flexible form factor. Innovations once only imagined in the solar industry now set the standard for generating highly efficient, low-cost energy.

Its dimensions, power ratings and voltage characteristics provide for maximum power and voltage alignment

Introduction. Suriname, also known as Republic of Suriname, is a country located on the north-eastern Atlantic coast of South America.. The country's total area is below 165,000 Km 2, which makes it the smallest country in South America. 80% of the country's area is covered with tropical rain forests, with only 1.5 million ha are considered suitable for agriculture.

Importantly, because it's proving to be a cost-effective solar solution, CIGS is increasingly utilized for a wide variety of applications. SoloPower CIGS technology is electrochemically deposited on a flexible stainless steel substrate -- our easily configured, thin-film solar cells can then be integrated into building construction materials, vehicles, off-grid applications and consumer ...

OverviewCompany historyFundingGovernments pay for defaultsSee alsoExternal linksSoloPower was a solar energy company developing and manufacturing Copper indium gallium selenide (CIGS) thin-film flexible Photo-voltaic Solar Panels. The company used a special electroplating technology to utilize nearly 100% of its materials. SoloPower was based in San Jose, California, and achieved the distinction of being the first company to obtain UL Certification of CIGS flexible solar panels in 2010. This was lauded as a sign...
