Peninsula and Weddell Sea.

South Georgia, sometimes referred to as Isla San Pedro, is an island that is located in the South Atlantic Ocean and is part of the British administration of the South Sandwich Islands and part of the British Overseas Territory of South Georgia. The island is located 1400km from the Falkland Islands and is about 170km long and 35km wide.

South Georgia South Georgia and its associated smaller offshore islands, islets and stacks lie between the parallels of 53°00"S and 55°00"S, and between the meridians of 34°30"W and 42°00"W. These islands are very isolated, lying about 870 miles (1,400 km) east-south-east of the Falkland Islands, 963 miles (1,550 km) north-east of

South Georgia and the South Sandwich Islands, the South Georgia and South Sandwich Islands (SGSSI) are a group of islands in the South Atlantic Ocean. The islands are part of the British Overseas Territory of South Georgia and the South Sandwich Islands. The islands are located 1400km from the Falkland Islands and is about 170km long and 35km wide.

With 11 main islands and several smaller islets, the South Sandwich Islands are also part of the South Georgia British Overseas Territory, despite lying around over 700-kilometres southeast. Volcanic in origin, this island chain is incredibly inhospitable and consists of numerous perilous peaks, some of which remain active while others are snow covered.

A hybrid PV/wind system consists of a wind energy system, solar energy system, controllers, battery and an inverter for either connecting to the load or to integrate the system with a utility grid as shown in Fig. 2. Here, the solar and wind sources are the main energy sources, and the battery gets charged when the generated power is in surplus.
