

Why is solar energy important in South Sudan?

As characterised by ample sunshine with strong solar power potential, South Sudan remains as one of key destinations on African continent for solar energy investment. In addition to this, it has been documented that evolution of solar PV is of great significance in South Sudan.

How long does solar energy last in South Sudan?

Proponents of solar energy argue that a solar system can produce reliable electricity for about 25 years. Having recognised solar energy potential, South Sudan is expected to put more emphasis on development of solar energy sector as part of its fight against energy poverty and economic diversification.

How solar energy can transform South Sudan's economy?

A solar energy can also be transformative to South Sudan's economy. For example, solar energy is affordable, cleaner and last longer as compared to energy from diesel-powered generators because generators need diesel to burn and they also need to be replaced after few years.

Does South Sudan have a fight against energy poverty?

The good news is that South Sudan has already started its fight against energy poverty and one evidence for that is the ongoing construction of Nesitu 20MWp PV Solar +35MWh BESS power plant at Nesitu, Juba.

Aptech Africa's 26MWp solar installation in Juba, South Sudan, alleviates energy demand issues, reduces costs, and benefits over 525,000 residents, hospitals, schools, and businesses, while also mitigating CO2 emissions.

To tackle energy poverty in South Sudan, SunGate Solar pioneered the deployment of a solar micro-grid to provide reliable 24-hour power to off-grid communities. To test its performance as a localized power generation and distribution network, SunGate Solar installed South Sudan's first solar microgrid to deliver clean, reliable, and ...

Discover how Aptech Africa is revolutionizing energy in Juba with innovative solar solutions, empowering businesses and residences to embrace sustainability while reducing costs and reliance on conventional energy sources.

Specifically for South Sudan, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and cross-correlation with the relevant socio-economic indicators.

SunGate Solar Ltd is a professional Solar Power design, installation, and maintenance company committed to improving the standard of living and development of South Sudan through the delivery of sustainable energy

for private, public, NGO, and commercial customers. SunGate Solar is owned and entirely staffed by South Sudanese.

"Variable Renewable Electricity (VRE) plus-storage projects are in the planning phase in South Sudan including a 20 MW solar park coupled with a 35 MWh storage system. 78 "In 2021, South Sudan installed a solar rooftop-diesel system for the Upper Nile University of ...
