

Specifications for installing photovoltaic panel scaffolding

Do you need scaffolding for a solar panel installation?

Solar panel installation is not short duration work and will need scaffolding or similar equipment. It should have a boarded working platform and full edge protection (double guard-rails and toe-boards) to stop people and tools from falling. Debris netting may also be necessary to prevent materials from falling on householders or neighbours.

What are the requirements for solar panel installation?

Solar panel installation is not short duration work and will need scaffolding or similar equipment. It should have a boarded working platform and full edge protection (double guard-rails and toe-boards) to stop people and tools from falling. Debris netting may also be necessary to prevent materials

What type of fixing system is used for solar PV panels?

The type of fixing system used will depend on whether the solar PV panels are going to be: ground mounted. Solar PV panels can be retrofitted onto an existing roof, on top of the tiles or other roofing materials, using roof anchors (also called roof-hooks or brackets), mounting rails and clamps.

What is a ground-mounted solar PV system?

a ground-mounted system. Ground-mounted solar PV panels are fixed to an A-frame or other purpose-built framework in much the same way as flat roof-mounted solar PV panels. The main difference is how the frame is fixed to the ground as the characteristics of a roof and the ground are very different.

Can solar panels be installed on a roof?

ground mounted. Solar PV panels can be retrofitted onto an existing roof, on top of the tiles or other roofing materials, using roof anchors (also called roof-hooks or brackets), mounting rails and clamps. Mounting rails are usually made of aluminium (due to its lightness) and other components from aluminium or stainless steel.

How long does it take to install a solar PV system?

Installing solar PV systems is fairly disruption-free and most systems are installed in two or three days. Unless your building is single storey, you'll need to have scaffolding put up.

However, if a rooftop installation isn't feasible or preferred, ground mounting is an alternative. It's essential to ensure that no obstructions shade the panels from the sun. Here's a brief guide to rooftop solar panel installation: Erect the ...
