Should you buy a solar PV system in Barbados?

One of the biggest, if not the biggest hurdle to further solar PV penetration in Barbados is the upfront cost of a system. When you think about the fact that the cost is essentially the prepayment of 25-30 years worth of electricity it makes sense that the price is "high". If you could purchase a ... Continue reading ->

Does Barbados use solar panels?

Solar panels are seen more and more frequently across Barbados. Similar to the ubiquitous solar water heater on Barbadian rooftops, the Government of Barbados is fully committed to the idea of renewable energy and solar PV, thereby preparing the country for even more substantial growth in this sector.

What is the installed solar PV capacity in Barbados?

The total installed solar PV capacity in Barbados is about 22MW(12MW RER +10MW utility).

Are Barbadians aware of solar energy usage & benefits?

Barbadians are aware of solar energy usage and benefits. Over the past few years, solar electricity systems have decreased dramatically in cost and more systems have been installed. As a result, the awareness level of Barbadians regarding solar energy has increased. In 2001, the installed capacity of solar PV in Barbados was 37 kW . Below is a list of the largest of these systems at that time:

Can Barbadians earn passive income from solar panels?
