

Midwinter's Day is a big deal in Antarctica. It marks the halfway point, after which the sun will eventually return. We dress up for a feast of dried, canned and frozen food. A team photo is taken and sent to teams at the other Antarctic stations. We exchange gifts, handcrafted over weeks and months with the wood, metal and various detritus ...

Sustentator - Offers installation services for both solar PV and solar thermal.. Raised funding over 1 round from 2 investors. Founded by Rodrigo Herrera Vegas, Daniel Nofal and 1 other in the year 2009. Sustentator has 11 competitors.

The last two years have seen unprecedented falls in the levels of sea ice around Antarctica, which serves as a protective wall for the continent's huge ice sheets. Researchers ...

The last two years have seen unprecedented falls in the levels of sea ice around Antarctica, which serves as a protective wall for the continent's huge ice sheets. Researchers are now racing to ...

The white, monochromatic vistas of Antarctica, a continent practically synonymous with ice, are becoming more verdant--at least around some of its edges. According to an analysis of 35 years of observations from Landsat satellites, the amount of vegetated land on the Antarctic Peninsula has increased more than tenfold since 1986.
