Why are solar module prices so volatile?

Alongside growing demand, since the start of 2023, S&P Global said a combination of importation duties, oversupply and supply chain costs have led to significant solar module pricing volatility. The tool will track six different module spot prices, covering differing geographies, megawattage and time periods.

What are Platts solar module price assessments?

The Platts Solar Module price assessments are aimed at providing a transparent source of pricing data. Image: Trina Solar Recent volatility in PV module pricing has prompted Platts, part of global market data and benchmarking provider S&P Global Commodities, to launch a new daily spot market price assessment for modules in the US, Asia and Europe.

The price assessments reflect solar modules with an output of 570-720W, TOPcon specification and wafer sizes of 182-210. Prices will be expressed in US cents per watt. The six assessments are:
