How many compartments does the intelligent high-voltage switch cabinet have?

The intelligent high-voltage [2]switch cabinet is divided into four independent compartments: bus room, instrument room, circuit breaker room and cable room. The protection grade of the cabinet is IP4X, as shown in Fig. 3. Intelligent high voltage switchgear diagram

What is intelligent high-voltage switch cabinet?

Intelligent high-voltage switch cabinet is equipped with electric earth switch, electric chassis car, intelligent vacuum circuit breaker and other components. It is the basis for realizing the "remote control" function.

What is a high voltage switch cabinet?

The traditional high voltage switch cabinet is mainly composed of isolation switch, earthing knife-switch, current transformer, surge arrester, vacuum circuit breaker, interlocking mechanism, live display, ammeter, signal indicator light, transfer switch, electromagnetic lock and cabinet body. The protection level of cabinet body is IP2X.

What is the role of intelligent high-voltage switchgear in modern distribution model?

Policies and ethics In the background of modern distribution model, people put forward higher requirements for the power system, and the intelligent high-voltage switchgear in the modern distribution model of the intelligent distribution network link plays a crucial role. This paper...

How does an energy storage spring work?

When closing is required, the positive transmission of the motor drives the clutch gear to rotate, thus driving the transmission gear and large shaft to rotate to the dead point of the energy storage spring, the position switch automatically switches the motor, and the earth switch quickly closes under the action of the energy storage spring.

What is the monitoring content of intelligent high-voltage switchgear?

The monitoring content of the intelligent high-voltage switchgear includes partial discharge monitoring, ultrasonic wave, geoelectric wave and temperature sensor to collect corresponding data, and then transmit it to the intelligent data acquisition gateway through wired mode.
