What is thinkeco power?

ThinkEco Power, a startup based in Vancouver, Canada, is tackling society's misconceptions about public transportation, specifically those that are sustainable. Stephen Kong, the company's founder, has utilized his passion for e-mobility and transportation to spearhead the development of a battery-powered ultra-light rail transit.

What is Kiribati integrated energy roadmap?

The resulting Kiribati Integrated Energy Roadmap (KIER) highlights key challenges and presents solutions to make Kiribati's entire energy sector cleaner and more cost effective. As a small, remote island state, Kiribati is highly dependent on imported energy supply. Electricity is one of the government's largest expenditures.

Why is thinkeco power launching a modular transit system in Qatar?

ThinkEco Power and its partners have successfully launched this modular, eco-friendly transit system in Doha, Qatar, and are working on several other projects across Canada and the UK. Funding has been difficult to obtain due to concerns about safety and vested interests in protecting popular transit solutions, such as the diesel train market.

Does Kiribati need electricity?

As a small, remote island state, Kiribati is highly dependent on imported energy supply. Electricity is one of the government's largest expenditures. Yet the current fossil fuel-based power system is inadequate to meet future demand.

Can thinkeco power solve a transit problem?

ThinkEco Power's patent pending modular transit system is poised to solve this issue as it is actively rallying for private funding to initiate development. "Unlike traditional transit systems that are cost and time intensive to build, ThinkEco's offering can be operational in under two months.

What is Kiribati doing about energy transition?

" Kiribati acknowledges the significance of energy transition and has the commitment to increase the use of renewable energy by 23% and 40% for South Tarawa and with 22% and 20% energy efficiency improvement for the outer islands.

The West Shore could become the test site of a new form of electric rail as support amongst local government grows. On Monday (June 26) Colwood council voted unanimously to endorse in principle a test proposal by ThinkEco Power Inc. and Penmark which would involve a six-month feasibility program, using a two to three-kilometre stretch of land to ...
