The current study concerning renewable energy potential and implementation in Tuvalu is at the crossroad of 2 issues, each with major strategic implications: climate change threats and worldwide oil crises. Given this context, what can renewable energy contribute to Tuvalu's benefit?

Renewable energy in Tuvalu is a growing sector of the country's energy supply. Tuvalu has committed to sourcing 100% of its electricity from renewable energy. This is considered possible because of the small size of the population of Tuvalu and its abundant solar energy resources due to its tropical location.

Target: Achieve 100% r enewable electricity and increase energy efficiency by 30%, by 2020; Status: In progress; RES: Solar photovoltaics, and biogas from pig manure. Implementation: In 2009, the government of Tuvalu adopted the National Energy Policy (NEP) setting out its 100% target. The National Energy Policy includes a mechanism which is ...
