

Despite solar capacity of just 7% in the country, Uganda's eight hours of sunshine per day represents huge potential for solar power's development. Attracting investment is key. As part of efforts to scale up solar PV investment, the government of Uganda introduced model contracts in their investment guides.

The opportunities and challenges of solar PV installations at different scales, from utility to community to household, in increasing electricity access and facilitating a just transition in developing countries such as Uganda are well documented by various scholars [14, 16]. Less is known, however, on what accountability relations are applicable in practice at ...
