How many high-capacity lithium-ion batteries are there in Ukraine?

High-capacity lithium-ion batteries mean the base stations, Shchyhol said, "should have reserve power sources for at least three days." And they can recharge themselves when the power comes back online. Two of the biggest telecommunications firms in Ukraine have, between them, already sourced and installed 22,000 new high-capacity batteries.

Why is Ukraine using high-capacity batteries?

With Russia regularly knocking out Ukraine's power grid, the country has turned to high-capacity batteries to keep it connected to the world--and itself. The streets of Kyiv during a blackout last year. Photograph: Mykhaylo Palinchak/Getty Images

Did Canada pay for Equalitie's first shipment of batteries to Ukraine?

Updated 10:25 am, February 24,2023: eQualitie's first shipment of batteries to Ukraine was paid for by Canada's government, not crowdfunding. The security firm is crowdfunding its second shipment. You Might Also Like ...

How do I sign up for the war in Ukraine?

Simply sign up to the War in Ukraine myFT Digest -- delivered directly to your inbox. In a tiny garage on the outskirts of Kyiv, a group of mechanics pored over the carcass of a wrecked old Tesla, stripping it of parts.

What has Shchyhol done for Ukraine?

That's where Shchyhol's ministry comes in. Working with private industry, his agency has laid or repaired 3,200 kilometers of fiber optic cable and built or rebuilt 1,500 mobile base stations--another name for cell towers--since the war began. That work has returned Ukraine's mobile communications to about 77 percent of its pre-war capacity.

Charge the battery in a well-ventilated room, as harmful gases may be released during charging. A car battery is an important element of your vehicle, and its stable operation depends on it. The right choice of battery, its timely replacement and regular maintenance will help to avoid a lot of problems and prolong the life of the battery.
