

Can solar power help prevent corruption in Ukraine?

They have determined that solar and wind energy would quickly deliver a distributed power supply system and prevent corruption. The war against Ukraine has led to massive destruction of the energy infrastructure. One consequence of this is blackouts in cities.

Is Russia targeting Ukraine's energy system?

Ukraine's energy system has been regularly targeted by Russia since its full-scale invasion in 2022, with attacks intensifying since the spring of 2024. The targeting of energy infrastructure has had wide-ranging consequences for the provision of energy to Ukrainian households and other consumers.

Why is Ukraine a key energy security issue?

"The situation in Ukraine is one of the most pressing energy security issues in the world today. Ukraine's energy system has made it through the past two winters thanks to the resilience, courage and ingenuity of its people and strong solidarity from its international partners.

Does Russia's attack on Ukraine's energy sector pose a threat?

A step change in the intensity of Russia's attacks on Ukraine's energy sector has created serious risks as winter approaches - requiring swift action and additional support to ensure Ukrainian citizens have reliable access to power and heating through the coming months, according to a new report from the IEA.

Why is Ukraine's energy system deteriorating?

Ukraine's energy system has endured two successive winters since Russia's invasion in February 2022. But following a significant escalation of attacks since spring 2024 on power plants, heat plants, transmission networks and more, the country's energy infrastructure is under huge strain.

Does Ukraine need a coordinated approach to energy security?

The report calls for a coordinated approach to ensure the energy security of both countries given their strong energy links. Ukraine joined the IEA Family as an Association country in 2022, following many years of cooperation on energy issues.

Researchers at ETH Zurich have been working with researchers from Ukraine and Germany to investigate how to rebuild Ukraine's destroyed energy infrastructure based on renewable energy. They have determined that solar and wind energy would quickly deliver a distributed power supply system and prevent corruption.

Sch&#252;t Energy Systems: Schnellkalkulation. Die Web-Applikation „Sch&#252;t Schnellauslegung" erm&#246;glicht eine schnelle Ersteinsch&#228;tzung der Auslegung von Fl&#228;chenheizungen. Mit wenigen einfachen Dateneingaben, ...

Ten such attacks this year have placed an enormous burden on the entire energy system. Before the first of this month's attacks, on 17 November, Ukraine had already lost 9GW of generation capacity.
