

United States leap electric solar services

What is Leap Energy Electric?

Leap Energy Electric is a division of LEAP Energy, Alberta's first locally owned and operated integrated utility company. Leap Energy Electric makes sure your budget goes further by utilizing tools, technology, and our team to complete jobs in an efficient and cost-effective manner.

How does Leap function?

Leap is a software-only solution that enables companies to quickly connect distributed energy resources (DERs), such as battery storage systems, electric vehicles, smart thermostats, and building management systems, to multiple energy markets. This connection allows these companies to earn revenue through demand response and other grid services programs.

Why do industry leaders choose LEAP?

Industry leaders choose Leap because Leap offers the fastest and easiest pathway to stand up Virtual Power Plants (VPPs) across multiple markets. According to Thomas Folker, Leap CEO and Co-Founder, "The U.S. Department of Energy's recent report calls for tripling the scale of VPP deployment by 2030."

What is Leap Connect?

Leap Connect is an app that reduces the complexity of customer meter authorizations by streamlining the process into a few simple clicks. Since launching in 2017, Leap has continued to build new product features to facilitate the fastest path to creating new value from DERs.

Does leap integrate with Google Nest thermostats?

Leap's platform integrates devices including Google Nest thermostats (pictured) which can be used for demand response. Image: Google.

Leap and Enode help customers get more value from energy devices. Leap and Enode are making it easy for residential energy consumers to participate in demand response programs. ...

Leap, an energy marketplace that enables virtual power plants (VPPs), announced an expansion of its role in the state this week to provide flexible electricity capacity ahead of peak summertime demand. Leap now has ...
