The Bank is made to be an alternative to a whole home gas generator. While a gas generator will run your home as long as you have fuel, a Bank unit will run it as long as the sun shines! Even ...

The Bank by Univix was created with business needs in mind, as a backup business energy solution that will work in all circumstances. Backup batteries that companies have traditionally used that depend upon the electrical grid or petroleum are either useless or loud, dirty and costly in the event of an outage that could affect your business.

The "Bank" by Univix gave us the mobility and flexibility to power our sustainable tiny home and camper units through solar which is stored in our Bank units. This company not only had the product we needed, but they estimated our storage capacity needs based on the needs of the house needing power. To top it all off, when they found out what we ...

The United States Minor Outlying Islands are nine island territories of the United States. They are Baker Island, Howland Island, Jarvis Island, Johnston Atoll, Kingman Reef, Midway Atoll, Palmyra Atoll and Wake Island in the Pacific Ocean; and Navassa Island in the Caribbean Sea. The islands are grouped together for statistical reasons. They are not administered together.

The Bank is a complete energy storage device that provides power for on-demand use, including all of the capabilities of a standard generator. The Bank is a greener solution that includes built-in Solar charge controllers. It can also be ...

In 1936, a colonization program began to settle Americans on Baker, Howland, and Jarvis. Still, all three islands were evacuated in 1942 due to World War II. [1] [2] ISO introduced the term "United States Minor Outlying Islands" in 1986. From 1974 until 1986, five of the islands (Baker Island, Howland Island, Jarvis Island, Palmyra Atoll, and Kingman Reef) were grouped under the term ...

The Bank is a complete energy storage device that provides power for on-demand use, including all of the capabilities of a standard generator. The Bank is a greener solution that includes built-in Solar charge controllers. It can also be charged from other alternative sources like Wind or Water turbines. Powered by a pure sine wave inverter, The Bank provides a straightforward setup ...

Navassa Island is an uninhabited island, less than two square miles in size, in the Caribbean Sea, between Jamaica and Haiti. Like many of these Minor Outlying Islands, it became a possession of the US as part of the Guano Islands Act, passed by US Congress in 1856, which allowed US citizens to claim any island with potential mineable deposits of bird guano, not already claimed ...
