

Venezuela natron company

Who is Natron Energy?

A Battery is Born. Colin Wessells founded Natron Energy as a Stanford Ph.D. student in 2012. His vision to build a company to deliver ultra-safe, high-power batteries started in a garage in Palo Alto.

How much money did Natron Energy get?

The US Energy Department awarded the company \$19.9 million in seed funding in 2020 and the California Energy Commission provided a \$3 million grant in 2019. S&P Global Commodity Insights spoke to Wessells, now co-CEO, about Natron Energy's technology, sodium-ion adoption in the US and how the company found financing.

Where are Natron Energy batteries made?

With our original location in Santa Clara, California, and our newly opened manufacturing plant in Holland, Michigan, Natron Energy batteries are entirely designed and made in the U.S.A. We're Growing and So Is Our List of Investors. Natron Energy is proud to partner with some of the most forward-thinking companies in the world.

Does Natron Energy use Prussian blue?

Wessells co-invented Natron Energy's patented technology, which uses the paint pigment Prussian blue within battery electrode materials for a higher power discharge, longer cycle life and lower safety risk compared to lithium-ion batteries, according to the company.

Will Natron Energy meet growing demand?

As more and more companies discover the difference our unique technology can make both to their ESG compliance and their bottom line, Natron Energy will continue to meet growing demand as we also expand into new and exciting industries. Have questions?

How did Natron start?

His vision to build a company to deliver ultra-safe, high-power batteries started in a garage in Palo Alto. After countless hours of development with an ever-growing team of scientists and engineers, Natron expanded, creating a state-of-the-art pilot production line for sodium-ion batteries in Santa Clara, California. An Industry First.
