Solar Energy Plan: In early 2023, Venezuela's Ministry of Electric Energy announced a plan to install 2,000 megawatts (MW) of solar energy over three years, starting with 500 MW in the states of Zulia, Falcón, and Lara. This initiative aims to generate approximately 8% of the country's electricity needs.

As Venezuela grapples with its electricity crisis, the push towards solar energy represents a promising step towards a more sustainable future. By harnessing the country's abundant solar resources, communities can reduce their reliance on traditional power sources and mitigate the impact of blackouts.

Venezuela is a nation overwhelmed by relentless blackouts and is searching for energy alternatives amid a long-lasting energy crisis. In Maracaibo, the second largest city in the country, solar energy has emerged ...

A Chinese-supported solar and wind farm in the Los Roques archipelago in the north of Venezuela remains unfinished. The lack of a legal framework for the energy transition, the prominence of thermoelectric plants and the lack of transparency in information put Venezuela in 111th place out of 115 countries in the Energy Transition Index ...

The Zulia and Venezuela Solar associations are asking the government to use its political and commercial ties with Beijing to negotiate a massive import of solar panels, and to make them affordable by eliminating taxes and granting soft loans.
