

As more and more of Europe's energy is generated from renewable sources like wind, solar, wave and tidal power, the case for a smart energy distribution grid becomes more urgent. For example, Germany's Energiewende programme has increased renewable power generation to 35% of the energy mix. That figure is set to rise to 45% by 2025 and 80% ...

The celebration of the European Week of Sport in Wallis and Futuna, thousands of kilometres away from continental Europe, shows how no matter the distance nothing prevents people from practicing sports.. This week holds a special significance in a territory particularly affected by non-communicable diseases, and with obesity touching more than 60% ...

France is also part of the European six nation shared frequency regulation market - which we heard more about from Corentin Baschet in our discussion of why energy storage deployment in Europe experienced a 2019 slowdown but is expected to bounce back and then continue to grow in the coming years. Of course, as we've seen in the past few months ...

In order to reduce the dependency on imported fuels for electricity, Wallis and Futuna are investing in renewable energy solutions. Solar energy has been identified as a particularly viable option, and efforts are being made to install solar panels and encourage the use of solar water heaters in homes and businesses.

Unveiling the Sources Powering Europe's Electricity Grid. Welcome to Energy Monitor's live electricity generation map, which tracks the electricity produced across the EU's 27 member states. The map is automatically updated every hour as new generation data is released by the European Network of Transmission System Operators (ENTSO-E).

Wallis & Futuna is quite literally on the other side of the world from France and Europe and it takes a long time to travel there. But it's a price worth paying! The little visited islands are a stunning and unforgettable natural paradise and it is ...
