

Which type of photovoltaic panel is best for self-built houses

What is the best type of solar panel?

The best type of solar panel overall is monocrystalline, as it achieves the best peak power output, efficiency ratings, and break-even point, all while looking good. However, perovskite solar panels are coming for its crown. When they're widely available, they'll revolutionise the market - and your electricity bill savings.

Are solar panels a good choice for your home?

Solar panels are a popular renewable energy system for UK homeowners, self-builders and renovators. In fact, over 220,500 solar panel installations were completed in 2023, according to data from the MCS (Microgeneration Certification Scheme). But how can you be confident you're buying the best solar panels for your home and lifestyle requirements?

Should you use solar panels when building a new home?

Today, when building a new home, it is required that you include energy saving measures and offsets such as cheap new build solar panels. These include solar panels or solar thermal systems. Solar panels do not need to detract from the attractiveness of your new build.
