

Who should I ask to handle any problems with photovoltaic panels

Do solar panels cause problems?

Thankfully, the rate of problems arising from solar panels is fairly low. Some 68% of solar panel owners told us they'd had no technical issues with their solar pv systems since they were installed. And nearly half of owners had done no maintenance at all on their solar panel system since it was fitted.

What should I do if I have problems with my solar panels?

If you encounter problems with your solar panels, contact the professionals to examine and resolve the issues. Keep in mind that this comes at a cost, so it's a good idea to shop around for value.

Do you need a solar panel maintenance service?

When solar panel maintenance is carried out on your solar system everything is thoroughly checked to ensure it's in full working order. This is one of the best ways to ensure your panels perform at their best for their full life. Unless you are a trained solar expert, you can't complete a thorough solar panel maintenance service yourself.

Are solar panels safe?

Solar panels are generally safe. However, it's recommended to contact a trusted solar panel electrician for a thorough inspection to ensure there are no issues. There are various other problems that can arise with solar panels, such as internal corrosion, delamination, roof issues, and even snail trails.

What should I do if I don't have solar system monitoring?

If you do not have solar system monitoring installed, the first step is to check for any obvious issues with the solar panels, such as a build-up of dirt, dust, mould, or leaves. Maybe a good wash with a soft broom and water is all that they need. Also, check no nearby trees have grown significantly and are shading the panels.

How can I avoid problems with solar panels?

The best thing you can do to avoid problems with solar panels is to ensure you work with a professional installation company to begin with. By working with DES Renewable Energy, you can ensure that your panels are positioned perfectly and that the installation is carried out professionally to reduce the risk of loose connections or damage.
